Overseer of the Poor.

ANNUAL REPORT

OF THE

SCHOOL BOARD.

The following is respectfully submitted :

FRANK P. MORRILL,	} School Board.
CHAS. H. WARD,	

It gives us pleasure to submit our report to the parents, guardians and citizens of the town, from the fact that so much good work has been done during the year. This cannot be attributed to other than the fact that our teachers, as a whole, have been earnest and faithful workers.

During the year our scholars have availed themselves of twenty-one weeks of school, divided into nine of summer, and twelve of fall; the summer term beginning as early as roads and weather would permit, and the fall term closing before cold weather and drifting snow came. If the parents and guardians of our children could realize the needed importance of more school weeks in each year, and would furnish the funds whereby this could be done, it would give our scholars a much larger field in which to work, and from which we should expect to realize a more bountiful harvest. There should be funds sufficient to sustain twenty-four weeks of school each year, then we could

proportions the terms into eight weeks each, thus having a winter school in some districts, which we consider is deemed almost a necessity.

As a whole, we feel confident that the general prosperity and condition of our schools have maintained their usual excellent standard, although we have had a few slight hindrances in one or two schools, whereby we deemed it advisable to shorten the term, and extend it at some future time.

It will be remembered that at our last school meeting, an appropriation was made by the town of New Hampton, and also by the town of Ashland, whereby the old school house in division No. 17, known as the union school house with the towns of New Hampton, Ashland and Center Harbor, has been repaired, and put in running order. New Hampton and Ashland having purchased the interest of Center Harbor, now own the repaired school house, with its new school furniture, in joint union, and I am confident our people feel proud that one of the old landmarks, almost effaced by the elements of nature, has been made to appear beautiful, and what is still more gratifying, has, as our report shows, twenty-four scholars in attendance. This is a good showing, for it will be remembered years have passed since a term of school has been kept in this part of the town. This school, like the union with Meredith, will each year alternately be under the supervision and management of the different boards, New Hampton having charge this year and Ashland next, and so on. This school room is now without a school chart, yet we hope to place one there during the coming year.

The Board have deemed it advisable to place in our schools, for the coming year, a few copies of "The American citizen," a book which everybody can read with great profit. Also a few copies of "Colburn's First Lessons in

Arithmetic," both books intended to be used as auxiliaries to those in present use.

In conformity to the recommendation of our worthy State Superintendent, J. W. Patterson, a committee consisting of the school board and three members of the Faculty of New Hampton Institute, were selected to make arrangements for the celebration of Columbus Day. Accordingly a program was arranged and copies distributed throughout the town, for Oct. 21st, being the day set apart for the National public school celebration. All of our teachers accompanied by their pupils, assembled in Chapel Hall, where a literary program was rendered; after which a picnic dinner was served. We are sure that everybody present on this occasion will long remember the celebration of Columbus Day. Each teacher and scholar present wore one of the national school badges, purchased at the expense of the town and presented free to all as a souvenir of the day and occasion.

We have in former reports and otherwise, suggested that teachers be more careful in filling out their registers. This year they were returned, and not a single register absolutely correct. Again, there is altogether too many absences upon our school registers. Last year we reported 1,542 days with 168 weeks of school. This year we have 1,628 days with 208 weeks of school. While a little improvement in this direction has been made, we see the need of much more. There is not a greater hindrance to the prosperity of our schools than irregular attendance. It seems to me parents do not realize the great injury occasioned, not only to the school, but to the scholar, by irregular attendance.

During the past year the instruction from our teachers has been good, yet there is need of more thorough fitting for the work. It has been our policy to retain progressive teachers, making as few changes as possible, and to favor

our home talent when it was possible. Our teachers have been selected with due regard to their qualifications for the positions assigned them. The teacher's position is one of responsibility; his duty is not only to teach the children, but to instill into their minds love for all that is good, and a abhorance of all that is evil, and place them upon the right path to happiness, honor and virtue, that they may become useful citizens in the community.

Many of our schools contain small scholars, some of which are backward in their studies. Such need all possible attention and encouragement from the teacher. While it is vastly more interesting for the teacher to give attention to advanced pupils, yet the dull scholar must not be neglected.

It is a fact that some of our school houses need painting, and we have been aware of this fact for several years, yet no appropriation has been made whereby we could do the work. We trust the citizens of New Hampton, will this year, appropriate largely for school and school house purposes.

In conclusion it is with deep sorrow that we announce the death of one of our board, Mrs. Rebecca R. Blake, an honored, faithful and efficient worker; one who was ever ready to do her share of life's duties. We feel she has left a vacancy in the community hard to fill, and it has been through her efforts, to a great extent, that the success of our schools have maintained their high standard, during her connection with them.
